Primary Health Care center and Social Worker

Pragati Pustak

It is a screening progame for children from 2 months to 24 months of age. It evaluates neonates and children for the Physical developmental milestones based on the patented pragati pustak document which is card provided to the parents. Screening takes place in the institute hospital and rural health center of the nearby villages on the day of vaccination, every month.

A team of Physios including a teacher and Undergraduate and Postgraduate students visit the Primary health center. A informative session in the form of PPT presentation is given to the villagers. Utility of the card is explained to the new visitors. Pragati pustak already provided to old visitors is checked with respect to the content filled up. Parents are explained about the developmental milestones and red flag signs which indicate the need for Physiotherapy intervention

Record is maintained in the form of one page assessment proforma which is maintained at institute OPD area.

Chest Clinic

Dept of Medicine

Chest OPD is held twice every week i.e. Tuesdays and Thursdays. Peak Expiratory Flow Rate (PEFR) is a measurement of peak expiratory flow of the patient.

PEF is a person's maximum speed of expiration as measured with a peak flow meter, a small, hand-held device used to monitor a person's ability to breath out air. It measures the airflow of bronchi and thus the degree of obstruction in the airways. It is typically measured in liters per minute (L/min).

It helps the therapist to emphasize about the performance of a complete cardiovascular physical examination. Therapist performs appropriate assessment and diagnosis of common problems referred to the cardiac clinic and develops plans for treatment, monitoring, and follow-up.

The patients are advice for enrollment in the Pulmonary Rehabilitation programme which is practiced in our OPD of Cardiovascular and Respiratory Physiotherapy.

KNEE CLINIC

Department of Musculoskeletal Physiotherapy conduct the knee clinic on every Tuesday between 10am to 4pm. The vision of conducting knee clinic are:

- To assess the patients with knee pain and difficulty in doing activities of daily living and advice them for the physiotherapy treatment.
- Advice for regular follow up visits.

Knee clinic was started in 2018, till now more than 1000 patients were treated. In the knee clinic we assess and treat the patients with various knee pain conditions. It includes traumatic knee pain with meniscal and ligament injury, osteoarthritis, post operative knee pain- ACL Reconstruction, Total Knee Replacement. The posted Post graduate and Intern students takes the detail assessment of this patients of this patients and maintains the record in the Knee Clinic assessment proforma. Also they gives the appropriate physiotherapy treatment including electrotherapeutic modalities and exercise therapy. The individualised home protocol also explains at the end of treatment. Patients then asked to re-visit the Physiotherapy OPD at given follow up date. In the monthly college council meeting, we present the documentation of assessment form and knee clinic statistics.

From this knee clinic posted students gets the exposure of variety of knee pain patients. Also, students get benefited with sample collection for their thesis related to knee pain.

Urban health center

DVVPF's College of Physiotherapy has its own urban health center at Professor Colony, Ahmednagar around 10km. from the college. The almost all Medical Services along with physiotherapy services are available at urban center.

Teachers, Interns & PG's are posted in Urban Health Center on regular basis. The purpose of this posting is to;

1. Better understanding of health related problems in society
2. Enhance the ability to manage on field issues related to patient care
3. Build up good citizenship within society
4. Improve communication skill.

One of the objective of the institute is to orient students to community based rehabilitation. These extension activities helps achieve our objective.

The primary objective of these extension activities it to provide health care at the doorstep of an individual. But the secondary objective is to make our students aware about the problems faced by the community on a day to day basis & to provide solution to them. These extension activities, in which the students are given the rotatory postings gives adequate exposure to the students about the potential problems and their on the spot solution.

- Here the students have to apply the knowledge gained in the institute according to the individual needs of patients.
- Thus the theoretical knowledge is converted into practical application that too, customized.
- This enriches their academic learning experience & inculcates the values of selfless patient care.
- This improves their clinical skill & allows them to practice effectively in a given setup.

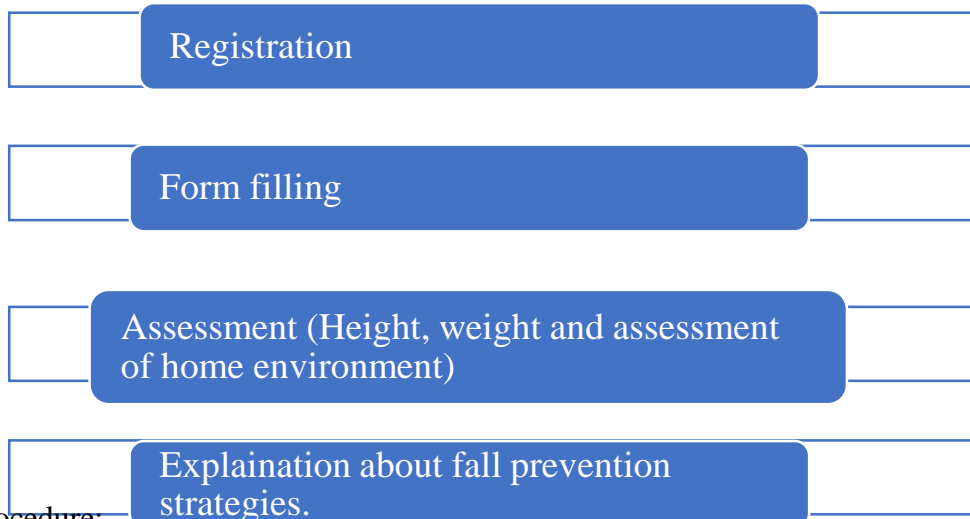

Falls clinic is conducted by the Department of Community Physiotherapy on every Tuesday between 11am to 1pm.

Aim and objectives:-

1. To educate elderly about falls.
2. To educate about environmental hazards at home.
3. To create awareness about fall prevention strategies.

Functioning:-

Procedure:-

1. After knowing the environmental accessibility proper explanation about environmental hazards is given.
2. Basic fall prevention strategies are explained to them.
3. At the end hard copy of information regarding fall prevention is given to every person.
